

# Ironing table for 5 jacket seams opening with heating, & suction

PFJ

**photo: mod. PFJ with supplements**

On its triple right pointed form 3 seams of jacket (back seam & 2 side seams) can be opened very easily and quickly. At the same time, the 2 shoulders seams can be opened in a special shape form, adapted to a side stand with autonomous foot pedal for the suction activating. The suction power is adjustable and, as all PERFECT series tables, it can be fitted with a blowing air device. It's important to mention, that the table is an economic alternative against the relative steam presses, as its cost is much lower and the power consumption save is almost 90%.

## TECHNICAL DATA

Adjustable height	: 75-90cm
Heating power	: 3 X 0,45KW
Suction power	: 1HP 400/220V-3ph.-50Hz
Foot pedal	: safety low voltage 24V
