

TRS 1315

TRS HAT

TRS A4

The manually operated heat multi-press TRS prints on ready-made clothes and caps. It is a flexible press that allows its operator to quick change printing platens.

The platens that can be used in the heat multi-press TRS are the following:

- **1315** for small flat surfaces with dimensions 13x15cm.
- **A4** for flat surfaces of a size of ISO A4 or 30x21cm. (Horizontal or vertical layout)
- **HAT** for caps

The pressing time and the temperature are controlled through a digital controller that calculates the daily production. The application pressure of the press increases and decreases depending on the operator's requirements with the use of a mechanism that is placed on the bottom part of the platen.

Temperature:.....0-250°C

Time:.....0-999sec

Power Supply:.....230V-1ph-50Hz

Model	Code	Features	Volt	Heating kW	Working Surface cm
TRS 1315	105-05-001	Manual Multi Press TRS 1315	230	0.6	13 x 15
